

# Toshiba Air Conditioners

## Benefits Of The Toshiba Multi-split System for 2 and 3 Rooms

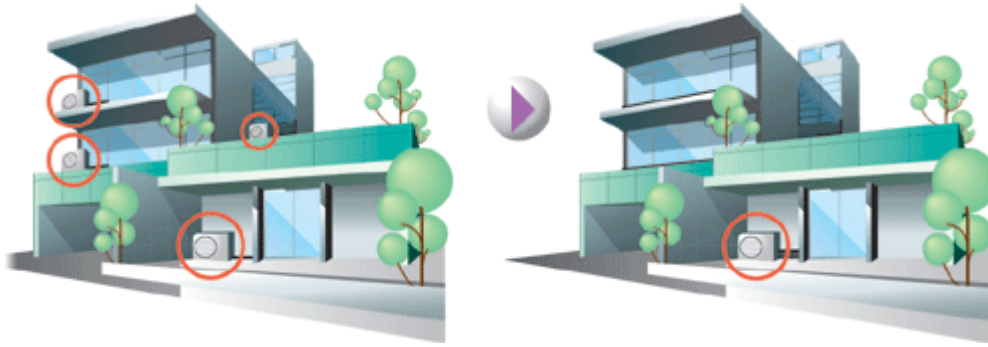

The **Toshiba cooling only Multi-System** creates optimal comfort level for a moderate price:

- **Advance air cleaning** through Toshiba 7-in-1 Filtration System tackles odours, bacteria, allergens and viruses. Its self-cleaning mechanism protects against the build up of mould.
- **A wide range of features** means that ultimate comfort is at hand. Super Quiet, Comfort Sleep and multiple airflow controls facility place an idyllic atmosphere at your fingertips.
- **Compact design** is key to modern living. To save space, one external compressor has been customised to serve up two or three indoor units.

## Small Outdoor Unit - Big Advantages

**Toshiba Multi-System outdoor units** (S2AX and UAX5 series) are **lightweight and compact**. With only ONE outdoor unit for 2 or 3 indoor units, the noise is significantly lower than 1:1 systems, it takes up much less space on your walls and keeps your environment neat and peaceful.

The compact outdoor units of Toshiba cooling only multisplit-systems can be installed easily at any facade or on an adequate place on the roof, balcony etc. The design is simple and unobtrusive and does not disturb the ambience.

- ❑ Galvanized steel housing covered with cream white paint
- ❑ Compact design (69x88x31 cm), capacity up to 8,8 kW
- ❑ Compressor and fan designed for minimized noise levels
- ❑ Large, air-cooled and bent heat exchanger for small space requirements

## Toshiba multisplit-system make air perfectly clean

Toshiba Multi-split hiwall indoor units (NKHX and SKPX series) are equipped with **7-in-1 Air Filtration System**. It helps stop airborne impurities from reaching you and your loved ones. Featuring Coffee extract, Vitamin C, Super Zeolite, Super Gingko and several other sophisticate filtration agents, this is technology for someone who cares enough to use the best.
