

# Supplements That Will Destroy Cancer Cells Such As Zeolite Enhanced with DHQ and Dtosin

*Except from: <http://www.cancerfightingstrategies.com/cancer-killers.html#sthash.LA725JUZ.dpbs>*

This strategy covers some of the strongest cancer cell killers that are completely safe to healthy cells.

For almost a decade, the feedback from users of Zeolite Enhanced now with DHQ has been superb, with many users saying that it got rid of their cancer or at least helped to do so. The results have been remarkable.

When chemotherapy and radiation therapy are used to kill the cancerous cells, they harm healthy cells in the process. In fact, chemotherapy can kill people faster than the cancer would have done.

**Cancer Killers** - These are antibodies fighting cancer cells

This report focuses on natural supplements that do a good job of killing cancerous cells, but don't cause harm to your body.

A few natural supplements suggested for fighting cancer may have the potential to be toxic to the body, and should probably just be used in conjunction with a naturopath or alternative doctor. These include cesium, artemisia, and B17.

In this report you will learn only about completely safe cancer supplements that can be used with no supervision.

You may well ask why, if a safe and natural product is able to kill cancer, your doctor doesn't recommend it. The answer is simple. Your doctor probably doesn't know about it, but even if he or she did, they are not likely to use it.

This is because of the nature of the medical/drug industry. Doctors use and recommend drugs that are approved in a process that costs hundreds of millions of dollars. Because of this high cost, the drug companies will only make drugs that can be patented. That way they can sell them for huge mark-ups and have no competition.

Unfortunately, because these drugs have been altered from nature, which they must be to be patented, they become toxic in your body, with harmful side effects. Your body can handle natural foods and herbs, the altered ones have toxic side-effects because your body can't handle them. This is the reason why the one of the biggest cause of deaths in the US is from medical drugs.

Because of the cost of getting approval for drugs, no company would ever take an unpatentable

natural product through the drug approval process. Consequently natural supplements aren't tested in multi-million dollars trials so can't be approved by the FDA to be used for cancer or whatever other health condition they may help. (Not that the FDA would approve a natural supplement that threatened the drug companies they are in bed with.) As they are not approved, doctors, or at least most doctors, won't use them, and most don't even know about them.

Alternative doctors not blinded by the medical/drug industry, find that a comprehensive approach to fighting cancer using supplements along with chemotherapy, works much better than only using drugs and other treatments that harm the body. But for now you have to turn to other resources to find safe cancer killers. One of the best has proven, through anecdotal use, to be a special liquid zeolite.

When healing from a cancer, you are always more likely to succeed if you work on it in several different ways. Many people have got rid of cancer using one or two products only, but others people have a tougher cancer or are in poorer health and must do much more to be successful.

If you have time on your side, you can always try one or two of the best supplements to see if they can get the job done on their own. If you find this is not working for you, giving you good improvement in a month or two, take it as a warning that your body needs more support than you have been giving it. And use more anti-cancer, health promoting supplements to more vigorously heal the body from cancer.

#### Zeolite Enhanced with DHQ

For years Zeolite Enhanced with DHQ has been is one of the best cancer killers we have seen. It even works better now when you use it with BLA. In fact, I've seen it work well so consistently for so many years, with no problems or safety issues, I shake my head in wonderment when I come across an article questioning its safety or effectiveness. They just don't know.

True, none of the other zeolites supplements test near as strong as Zeolite Enhanced with DHQ does. Not by a long shot.

#### **Zeolite works exceptionally well at fighting cancer as an informal 14 month study a number of years ago showed.**

65 people with mostly stage 4 cancer, who had a prognosis of about 2 months to live, were given a type of liquid zeolite.

At the end of the study, 51 people were cancer free and six more were alive, but still fighting cancer. This is a 78% cure rate for terminal cancer, an incredible 89% survival rate.

This study was similar to what happens in the real world. There was no control as to what drugs people were taking, or what other protocols they were on. Every person in the study basically answered an ad in a newspaper that said, "If your doctor has given up on you, call us." So they were mostly people who had late stage cancer, whose doctors had sent them home to get their affairs in order.

Throughout the study, many patients used some sort of adjunctive treatment. For example, a lung cancer patient was told to go home and get his affairs in order. After three months on this liquid zeolite, he was feeling much better. He went back to his oncologist, who suggested that he was strong enough to undergo more chemotherapy and radiation. So he stayed on the zeolite, but he also went on chemo and radiation at that point.

Not bad for a bunch of folks sent home to die.

**We've seen many testimonials where someone took Zeolite Enhanced, or Zeolite Enhanced and another product or two, and got over a tough cancer.**

For example, Theresa was giving Zeolite Enhanced only to her sister with advanced small cell lung cancer that had spread to the liver. Small cell lung cancer, if you are not aware of this, is one of the most aggressive and deadly cancer. And spreading to a major organ like the liver didn't make likelihood of survival any better.

Yet after several months of only using Zeolite Enhanced, the cancer was completely gone. She said, "The doctors call it a miracle, but we call it Zeolite Enhanced!"

"In July 08 I was told that my PSA was 28. A Biopsy was performed which confirmed that I had a most aggressive prostate cancer (4+5=9) on the Gleason score, bone scan plus MRI followed. My scan and MFI showed that my bones were clear but the cancer had progressed into my lymph glands. The doctor recommended that I start hormone therapy before starting chemotherapy, after 3 months of the hormone therapy.

"On looking on the internet I came across Zeolite Enhance, this I have been taking since the beginning of August at a dose of 120 drops per day. Yesterday the 29th Oct. 3 months after starting to take zeolite I had an appointment with my doctor, only to be told that my PSA was now 4.1 and that I didn't need any further treatment except to continue with the 3 monthly hormone injections with a revisit to the doctors in 6 months. If you wish to use my name and address, please feel free to do so!

Yours, Mike Player

"Great Great news my mum has had confirmation that her lung cancer has gone. Thanks to everyone a miracle has happened. I will now cut the supplements down, and the remaining supplements I will cut the dosage.

Kind Regards,

Margaret P

(She was using Zeolite Enhanced and about 20 other products suggested in this report for just a few months.)

"My dog was diagnosed in August as having a malignant tumour. He had accidentally bumped his head about two weeks earlier, & a large lump had quickly developed. The vet more or less

wrote him off, as his insurance would not have covered the large sums of money involved in providing treatment. Also, he's about ten years old, a large dog, & I really didn't want him to have to endure the upset of receiving scans, radiotherapy, etc. In my desperation to help him I searched the internet for something that would treat cancer. I soon found a site which pointed me in your direction. So, I started to treat him with Liquid Zeolite with DHQ on 3rd September. For a few weeks it was difficult to see any difference in the tumour. Although his arthritic condition improved, as well as his chest problems.[ He had begun to cough & splutter during the summer.]

Within the last few weeks however, it has become obvious that the tumour has started to shrink. Although it's difficult to be accurate, I would say that it has shrunk by as much as half. So hopefully, it will be gone by Christmas. I have been giving him 25 drops four times a day.... Perhaps you think that I'm overdosing, but the cancer is so virulent that I thought that a high dosage was best. I have been telling everyone I meet about liquid zeolite, because I can see that it really works. Hopefully, by making people aware of it lives will be saved. I just wanted to let you know what has happened, & to thank you for all your help. I will let you know of any further progress.”

John H

"I am delighted to tell you that I have received my order in the post this morning. I am so relieved as I realize that Christmas post could have caused the delay! My father is taking the medication following a course of radiotherapy for inoperable throat cancer. Over the last few days we have noticed that the huge lump on the side of his neck has almost disappeared and yesterday he was able to eat solid food for the first time in a few weeks. We are continuing to give my father the treatment and will update you on his condition. Thank you for your kind and attentive service.

Regards,  
Janice P.

More remarkable results....

"Jeff and I went to Emory yesterday, the 29th for his follow up visit. He had gone from a 12,000 tumor marker down to a 10.2 and they scheduled him to come back in three months for his check up, not every six weeks.

He and I would like to thank you so very much for all your help and recommendations. You have been an answer to many, many prayers. God has blessed you with information that needs to be shared with so many other people around the world. Thanks for all you do and the very much needed help you have provided.... Thanks again, our lives will never be the same !!" Jennifer J.

(He had used for about one month Zeolite Enhanced with DHQ and a couple of other supplements recommended here.)

### **How zeolite works to fight cancer.**

According to information in United States Patent 6,288,045, zeolite can, when pulled into cancer

cells, activate the P21 gene which tells a cancer cell to die, or literally, according to this patent, destroy the nucleus of cancerous cells.

Zeolite is a negatively charged volcanic mineral that naturally attracts positively charged toxins to it. (All toxins are positively charged.) It traps them in its cage-like structure. In other words, it absorbs toxins. Zeolite's negative ionic charge turns slightly positive after it is full of the positively charged toxins it has absorbed. Normal cells have a neutral charge while cancer cells have a slightly negative electrical charge. So the now slightly positively charged zeolite molecule is attracted to cancer cells.

**The energetic frequencies and additional ingredients in Zeolite Enhanced with DHQ increase the ability of the zeolite to find and enter cancer cells.**

Once inside the cancer cells, zeolite kills them two ways, according to the Zeolite Patent.

Zeolite activates the p21 gene. The function of the p21 gene is to tell the cancer cell to die. P21 acts as a tumor suppressor as it controls cell cycle progression. The activation of P21 appears to halt the growth of tumors by directly suppressing growth signals. In in-vitro studies, all cancer cells tested were destroyed in 72 hour. There are no side effects because it specifically targets cancer cells as it is not attracted to normal healthy cells.

Even more important, the tri metallic part of the zeolite destroys the nucleus of the cancer cells it enters. Some cancer cells are destroyed in an outward burst of the cytoplasm. In other cases cells are destroyed when their wall and membrane collapse after the nucleus is destroyed.

Most often, after the nucleus and the cytoplasm are destroyed, the entire cellular contents dissipate into the surrounding environment. The membranes of these now dead cancer cells remain intact, but no cellular structures are left.

Because zeolite's ionic charge, when full of toxins, pulls it to cancer cells only, it does not kill healthy cells.

**Zeolite improves health in several other ways.**

It chelates and removes heavy metals, pesticides, herbicides, and other toxins from your body. It does this in a hierarchical manner. Studies show that it is most attracted to lead, mercury, cadmium, arsenic and other heavy metals.

Once the amount of heavy metals are depleted, it starts to work on getting rid of pesticides, herbicides, plastics, and so forth. It also acts as a natural trap of viral particles which stops production of the viruses.

Because it traps toxins in its molecular structure and carries them out of the body as it is easily eliminated within 6 hours or so, it detoxifies without overloading the detoxification system in your body. It takes a strain off the liver and kidneys.

As toxins are an underlying cause of almost all cancers, taking zeolite on a regular basis is an excellent cancer preventative. Especially as it can kill any cancer cells that may develop.

Zeolite traps free radicals in its molecular structure so it acts as a free radical scavenger.

Zeolite will help normalize pH levels.

And boosts the immune system as it increases levels of CD4 immune system molecules.

### **One important benefit when the liver is functioning poorly...**

Ammonia is a toxin that has no place in a healthy body. Thousands of people with liver and kidney disease die every year from too much ammonia in their blood. The average person can handle low levels of ammonia in their blood, but even a low level adds stress to the immune system, and compromises health.

Most ammonia forms in the body when protein is broken down by un-friendly bacteria in the intestines. It is also produced by parasites, yeasts and molds. These organisms produce ammonia both as a waste product, but also as a mechanism to keep their host (your body) in an unhealthy state. As candida yeast is almost always overgrown and infecting the whole body of someone with cancer, you may well have high levels of ammonia in your body.

A healthy liver converts ammonia into urea, which is then eliminated in urine. A benefit of dietary zeolite is its ability to remove ammonia directly from your body, which means less stress on your liver and kidneys. A big bonus for your health if your liver is weak.

Of course, reduced ammonia is also a bonus for healthy digestion, pathogens and parasites are weakened, and beneficial bacteria can better recolonize.

For this reason the use of dietary zeolite may be very helpful if your liver is not working properly. Ammonia that remains unprocessed because the liver is not working up to par can enter the bloodstream and invade the central nervous system, causing many dangerous effects.

Even your brain can be affected. In advanced cases of liver disease, for example, the ammonia may cause at first a mild mental aberration which can progress to coma, and ultimately, death. Increased levels of ammonia in the blood are characteristic of liver failure.

**Zeolite Enhanced with DHQ is a frequency enhanced liquid zeolite, that is, based on our energetic testing and a lot of feedback from users, the most effective zeolite supplement available. The best by a very wide margin.**

As of April, 2014 Zeolite Enhanced with DHQ has been upgraded and now it tests even stronger than it did before the upgrade.

It now comes in a 2 ounce spray bottle so you get twice as much as before. It is greatly enhanced with a number of changes. The improvements begin with using the very best processed zeolite, A zeolite that has been pharmaceutically processed to be absolutely clean, with no impurities of any type.

This form of zeolite is the only one that has been tested in research studies that proved it is extremely effective at dealing with unwanted cells. It is an upgraded version of the liquid zeolite we first sold a decade ago.

Now that this high quality, impurity free zeolite has become available again, we decided to use it in our Zeolite Enhanced with DHQ. We want only the best. Not only does this zeolite have much more science behind it, but it tested much stronger in our energetic testing.

We always add, if possible, additional ingredients to a formulation to boost its effectiveness. So we included a wide variety of ingredients, all of which tested as being able to significantly boost the effectiveness of this new version of Zeolite Enhanced with DHQ.

In fact, this new version -- in our energetic testing -- tests 150% better than our previous best testing liquid Zeolite Enhanced with DHQ. And many time stronger than any other zeolite product on the market, liquid or powder.

This proprietary blend of additional ingredients that supercharges this zeolite Includes: Dihydroquercetin from Grape leaf. Herbal extracts: Asian Ginseng, Uva Ursi, Gotu Kola. Bach Flower Essences: Star of Bethlehem, Self-Heal and Five-Flower. Amino Acids: Analine, L-Arginine, Aspartic Acid, Glycine, Glutamic Acid, L-Lycine, Leucine, Proline, Serine, Theonine, and Valine. Homeopathic: Bioplasma Cell Salts, Silicea 12X and Arnica. Organic Essential Oils: Rosemary, Orange and Lemon.

Ingredients: K-Natural™ (LifeHealthSciences), Proprietary Blend as listed above\*, L-Ascorbic Acid, Optiblend™, Colloidal Silver, Citric Acid, Purified Structured Water.

### **Zeolite Enhanced with DHQ is superior in three ways.**

1. The manufacturing process makes this zeolite the very highest quality zeolite, purified and concentrated.
2. The energetics, herbs and ingredients in it make the zeolite better able to be transported throughout the body and into cancer cells.
3. The vibrational frequencies and all the additional ingredients in it greatly increases its healing power for overall health improvement.

### **The Frequency Enhancing And Additional Ingredients Story**

What actually first made Zeolite Enhanced better than all other zeolites, was that it had been *energized* or imbued with special vibrational frequencies 8 or 9 different ways. This creates three cancer killing activities, all equally important.

1. The energetic frequencies and ingredients enhance the zeolite's capability to be *attracted to cancerous cells*. So you get more zeolite to those cells. Making Zeolite Enhanced more effective.

2. These special frequencies and ingredients improve the ability of the zeolite to *enter cancer cells*. And that's the name of the game when you are fighting cancer with zeolite. You see, these special vibrational frequencies send messages to cells, influencing what they do. They communicate with your cells. The frequencies in Zeolite Enhanced influence cancer cells to take the zeolite into the cell.

3. Finally, the specific frequencies that energize are able to kill cancer cells on their own. Cancer cells have a low vibrational frequency but they naturally must try to match or entrain to the high frequencies in Zeolite Enhanced with DHQ when you get these frequencies into your body. This ends up killing the cancer cell because they don't operate at those frequencies. The same frequencies make your healthy cells stronger.

The interesting thing about the value of frequency enhancing, or at least the extensive frequency enhancing that Zeolite Enhanced with DHQ has, is how big a difference it made in its potency - according to our energetic testing.

Zeolite manufacturers and distributors naturally try to sell you the product they have and sell. So they tout their cleaned cage, or how they have the real original process, or their nano processing and how they have so much zeolite in their liquid, a little falls out if you let it sit, or their ability to process the zeolite with the humic acid, etc. Yet in my energetic testing, all these zeolites, except the cheap one that sells just on price, though they claim they are the best, were about the same potency.

The original liquid zeolite, NCD energetically tests at **320**. There is a SuperZ liquid that comes in at **312**, the one that comes from a manufacture that puts the zeolite inside a humic acid molecule is **328**. A Trinity liquid is **315**. 360 zeolite is **330**. Every other one I test is right in the same ballpark, except the ultra liquid zeolite (enhanced with DHQ) from the liquid zeolite company that claims to be the one I recommend. It tests at **270**. Their Nano Cellular Zeolite is better, testing at **340**. ORME zeolite with monatomic minerals comes in at **320**. Even **Zeolite powder** comes in at **300**.

This newly supercharged Zeolite Enhanced with DHQ is my top recommendation for a zeolite product because it tests at **2800**.

The zeolite that is used as its base tests at **470**. The huge difference lies in the precise combination of additional ingredients, and the energetics that influence how it acts in the body. That enable more of the zeolite to get into cancer cells. Once in cancer cells, the zeolite shreds up the cancer cells.
